INTERNATIONAL TAX QUIZ

THIS WEEK'S NEW QUIZ

XCO is a company which is incorporated in country A, but which has its central management and control in country B. It is a resident under country A tax law, and it is a resident under country B tax law. XCO's place of effective management is in country B. XCO licenses (for arm's length royalties) a patent to YCO, which is a company resident in country C. The A/B, A/C and B/C double tax treaties are all identical to the 2014 OECD model treaty, with the exception of the source country tax rate under Art. 12 – the rates are 5% (A/B), 10% (A/C), and 15% (B/C). The MLI does not apply to any of the 3 treaties. XCO is the beneficial owner of the royalties, and XCO does not have a PE in country C. Country C's domestic law withholding tax rate on outbound royalties is 30%.

What tax rate is country C permitted to levy on the royalties paid by YCO to XCO? Why?

Answer in next ITB email alert!
